# PRICE LIST of IRIS

ROBERTS ROSE CO.  
ENGLEWOOD, COLO.

# Offering of Choice and Rare IRIS

by the  
**ROBERTS ROSE COMPANY**

Irises are the leaders in the May garden; wonderful in mass, and exquisite in detail. They have a place in quantity in every garden, and are beloved by gardeners because of their color and hardiness.

The Iris Society took a vote among its members to determine their estimate of the relative value of the varieties in commerce. These votes were tabulated on a basis of 100 representing perfection, and the figures arrived at are shown immediately after the name of the iris on this list. We have included in the following all of the iris receiving unusually high ratings and have eliminated practically all below 80. This symposium figure shows more clearly the garden value of the iris than does the price. In all cases the matter of price is a consideration of supply and demand. The following is a check list of the varieties planted in our garden where they may be examined side by side in their blooming season. We are frank to admit that we think no iris worth ten dollars.

The culture of the iris is of the simplest. Any sunny place on any well drained soil will do. No fresh manure should be permitted to come in contact with the rhizomes. They can be planted any time when not in bloom, although late summer and fall is the best.

In the following descriptions the letter S. has been used to denote the standards, or the upper half of the flowers, while F. will be the falls, or the petals inclined downward.

At the prices quoted we furnish a clump of several roots in the inexpensive varieties. We have many other varieties of iris in our collection, and can furnish a much larger list of named varieties if desired.

Where large plantings are to be made and the color is not important, we can furnish unnamed varieties of iris for \$10.00 per hundred.

We are now at work on Japanese iris, and by 1924 will have a large list to offer. Anyone intending to make an early planting of this variety would do well to correspond with us.

We guarantee all iris put out by us to be healthy and absolutely true to name.

## Germanica Type

<b>Afterglow</b> , 86. Buff gray, shading to a rich yellow through the center .....	\$ 2.00
<b>Alcazar</b> , 89. S. blue lavendar; F. medium red-purple. A giant in flower and growth.....	1.25
